

Customer Notes:

- Client appreciated the fonts, color and template of High-Fidelity Prototype
- They liked the use of different vibrant colors in design
- They appreciated our blog design and management of content on blog
- They appreciated the way documentation is done in the E-Library as well as local project page
- News and events are well organized
- Uncomplicated design
- Verification option important for security reasons
- Web pages are visually appealing

Local projects were more highlighted in our design. Client really appreciated the idea that web design is more focused on local RCE Saskatchewan and the work local communities are doing to achieve the goals of Sustainable development.

Team Insights:

- We are looking forward to work on Mobile design
- We want to add more features to home page
- Home page need to be more visually appealing
- It is better to add ambiguity in the images that are included in webpages

We would like to work on software that can read screen for blind internet users. A screen reader software that will translate screen content into synthetic speech.
